DETAILED ACTION

Claims 24-27 and 36 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 24-27 and 36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 24 recites the limitation "said elastomer seal" in line 5 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 24-27 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0 319,701 A1 in view of Mehra et al (US 4,614,585).

Claim 24: EP teaches a device for filtering a liquid under pressure having an intake body, a filtering membrane, a drainage body (see figure 1), means for supporting the membrane, drainage

body has a table with a concave surface for supporting the membrane, intake body has a wall with a surface facing the membrane, the membrane squeezed between the two surfaces (see figures).

EP does not teach an elastomeric seal for sealing the membrane as in claim 24. Mehra teaches a seal for sealing the membrane in a filter of similar construction (see figures, col 2 lines 47-60). It would be obvious to one of ordinary skill in the art at the time of invention to use the teaching of Mehra in the teaching of EP for a more effective seal as taught by Mehra (see col 2 lines 47-60).

Claim 25 and 36: the concave surface profile of the membrane support corresponds to the stretched membrane surface when wet or under fluid flow (see page 2 of the specification or claim 1, and figure 3b). The EP patent teaches the expansion of the membrane due to fluid flow under pressure, and does not specifically say that the expansion of the membrane is by wetting alone. However, the expansion by wetting is inherent when the fluid flows through the membrane. The express, implicit, and inherent disclosures of a prior art reference may be relied upon in the rejection of claims under 35 U.S.C. 102 or 103. "The inherent teaching of a prior art reference, a question of fact, arises both in the context of anticipation and obviousness." In re Napier, 55 F.3d 610, 613, 34 USPQ2d 1782, 1784 (Fed. Cir. 1995) (affirmed a 35 U.S.C. 103 rejection based in part on inherent disclosure in one of the references). See also In re Grasselli, 713 F.2d 731, 739, 218 USPQ 769, 775 (Fed. Cir. 1983).

Claims 26 and 27: the support means is a porous pad 5 (see figures). Pad 5 has channels 18, and they open into the output aperture 1c (fig 1).

Response to Arguments

Applicant's arguments with respect to claims 24-27 have been considered but are moot in view of the new ground(s) of rejection.

It may please be noted that the applicant's amendment of claim 24 made it broader than originally filed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
